TITLE : COATING MATERIAL

ABSTRACT : PURPOSE: To obtain a coating material composed of zeolite and/or magnesium silicate, an inorganic binder and a dispersion medium and Providing films capable of removing malodor and noxious gases.

CONSTITUTION: The objective coating material is composed of zeolite and/or magnesium silicate, an inorganic binder and a dispersion medium. Furthermore, copper-containing zeolite is preferred as the zeolite and a platinum group metallic salt is preferably added to the objective coating. Aluminum hydroxide, glass power, water glass, etc., are used as the inorganic binder.
